Module: tf.keras.models

Contents
Classes
Functions

Defined in `tensorflow/python/keras/models/__init__.py`.

Keras models API.

Classes

`class Model`: The `Model` class adds training & evaluation routines to a `Container`.

`class Sequential`: Linear stack of layers.

Functions

`load_model(...)`: Loads a model saved via `save_model`.

`model_from_config(...)`: Instantiates a Keras model from its config.

`model_from_json(...)`: Parses a JSON model configuration file and returns a model instance.

`model_from_yaml(...)`: Parses a yaml model configuration file and returns a model instance.

`save_model(...)`: Save a model to a HDF5 file.
