tf.contrib.framework.get_variables_to_restore

```
get_variables_to_restore(
    include=None,
    exclude=None
)
```

Defined in `tensorflow/contrib/framework/python/ops/variables.py`.

See the guide: Framework (contrib) > Variables

Gets the list of the variables to restore.

Args:

- `include`: an optional list/tuple of scope strings for filtering which variables from the VARIABLES collection to include. None would include all the variables.
- `exclude`: an optional list/tuple of scope strings for filtering which variables from the VARIABLES collection to exclude. None it would not exclude any.

Returns:

a list of variables to restore.

Raises:

- `TypeError`: include or exclude is provided but is not a list or a tuple.
