tf.write_file

```
write_file(
    filename,
    contents,
    name=None
)
```

Defined in `tensorflow/python/ops/gen_io_ops.py`.

See the guide: Inputs and Readers > Dealing with the filesystem

Writes contents to the file at input filename. Creates file and recursively

creates directory if not existing.

Args:

- `filename`: A `Tensor` of type `string`. scalar. The name of the file to which we write the contents.
- `contents`: A `Tensor` of type `string`. scalar. The content to be written to the output file.
- `name`: A name for the operation (optional).

Returns:

The created Operation.
