tf.contrib.deprecated.merge_summary

```
merge_summary(
    inputs,
    collections=None,
    name=None
)
```

Defined in `tensorflow/python/ops/logging_ops.py`.

Merges summaries. (deprecated)

THIS FUNCTION IS DEPRECATED. It will be removed after 2016-11-30. Instructions for updating: Please switch to tf.summary.merge.

This op is deprecated. Please switch to tf.summary.merge, which has identical behavior.

This op creates a `Summary` protocol buffer that contains the union of all the values in the input summaries.

When the Op is run, it reports an `InvalidArgument` error if multiple values in the summaries to merge use the same tag.

Args:

- `inputs`: A list of `string` `Tensor` objects containing serialized `Summary` protocol buffers.
- `collections`: Optional list of graph collections keys. The new summary op is added to these collections. Defaults to `[GraphKeys.SUMMARIES]`.
- `name`: A name for the operation (optional).

Returns:

A scalar `Tensor` of type `string`. The serialized `Summary` protocol buffer resulting from the merging.
