

tf.losses.get_regularization_loss

```
get_regularization_loss(  
    scope=None,  
    name='total_regularization_loss'  
)
```

Defined in [tensorflow/python/ops/losses/util.py](#).

Gets the total regularization loss.

Args:

- `scope` : An optional scope name for filtering the losses to return.
- `name` : The name of the returned tensor.

Returns:

A scalar regularization loss.
