

## tf.contrib.gan.features.condition\_tensor\_from\_onehot

```
condition_tensor_from_onehot(  
    tensor,  
    one_hot_labels,  
    embedding_size=256  
)
```

Defined in [tensorflow/contrib/gan/python/features/python/conditioning\\_utils\\_impl.py](#).

Condition a tensor based on a one-hot tensor.

Conditioning scheme based on <https://arxiv.org/abs/1609.03499>.

## Args:

- **tensor** : Tensor to be conditioned.
- **one\_hot\_labels** : A Tensor of one-hot labels. Shape is [batch\_size, num\_classes].
- **embedding\_size** : The size of the class embedding.

## Returns:

**tensor** conditioned on **one\_hot\_labels**.

## Raises:

- **ValueError** : **one\_hot\_labels** isn't 2D, if non-batch dimensions aren't fully defined, or if batch sizes don't match.
