

tf.gfile.Mkdir

`Mkdir(dirname)`

Defined in `tensorflow/python/lib/io/file_io.py`.

Creates a directory with the name 'dirname'.

Args:

- `dirname` : string, name of the directory to be created

Notes: The parent directories need to exist. Use `recursive_create_dir` instead if there is the possibility that the parent dirs don't exist.

Raises:

- `errors.OpError` : If the operation fails.
