

Module: tf.contrib.linalg

Contents

Classes

Defined in [tensorflow/contrib/linalg/__init__.py](#).

Linear algebra libraries.

See the [Linear Algebra \(contrib\)](#) guide.

Classes

class LinearOperator: Base class defining a [batch of] linear operator[s].

class LinearOperatorComposition: Composes one or more **LinearOperators**.

class LinearOperatorDiag: **LinearOperator** acting like a [batch] square diagonal matrix.

class LinearOperatorFullMatrix: **LinearOperator** that wraps a [batch] matrix.

class LinearOperatorIdentity: **LinearOperator** acting like a [batch] square identity matrix.

class LinearOperatorScaledIdentity: **LinearOperator** acting like a scaled [batch] identity matrix $\mathbf{A} = \mathbf{c} \mathbf{I}$.

class LinearOperatorTriL: **LinearOperator** acting like a [batch] square lower triangular matrix.

class LinearOperatorUDVHUpdate: Perturb a **LinearOperator** with a rank **K** update.
