

tf.resource_loader.get_root_dir_with_all_resources

```
get_root_dir_with_all_resources()
```

Defined in [tensorflow/python/platform/resource_loader.py](#).

Get a root directory containing all the data attributes in the build rule.

Returns:

The path to the specified file present in the data attribute of `py_test` or `py_binary`. Falls back to returning the same as `get_data_files_path` if it fails to detect a bazel runfiles directory.
