

tf.contrib.graph_editor.add_control_inputs

```
add_control_inputs(  
    op,  
    cops  
)
```

Defined in [tensorflow/contrib/graph_editor/reroute.py](#).

See the guide: [Graph Editor \(contrib\)](#) > [Module: reroute](#)

Add the control inputs cops to op.

Warning: this function is directly manipulating the internals of the tf.Graph.

Args:

- `op` : a `tf.Operation` to which the control inputs are added.
- `cops` : an object convertible to a list of `tf.Operation`.

Raises:

- `TypeError` : if `op` is not a `tf.Operation`
- `ValueError` : if any `cop` in `cops` is already a control input of `op`.
