

tf.initialize_all_tables

```
initialize_all_tables(name='init_all_tables')
```

Defined in [tensorflow/python/ops/lookup_ops.py](#).

See the guide: [Variables > Sparse Variable Updates](#)

Returns an Op that initializes all tables of the default graph. (deprecated)

THIS FUNCTION IS DEPRECATED. It will be removed in a future version. Instructions for updating: Use `tf.tables_initializer` instead.

Args:

- `name`: Optional name for the initialization op.

Returns:

An Op that initializes all tables. Note that if there are not tables the returned Op is a NoOp.
