

Module: tf.estimator.export

[Contents](#)[Classes](#)[Functions](#)

Defined in [tensorflow/python/estimator/export/export_lib.py](#).

Utility methods for exporting Estimator.

Classes

[class ClassificationOutput](#) : Represents the output of a classification head.

[class ExportOutput](#) : Represents an output of a model that can be served.

[class PredictOutput](#) : Represents the output of a generic prediction head.

[class RegressionOutput](#) : Represents the output of a regression head.

[class ServingInputReceiver](#) : A return type for a serving_input_receiver_fn.

Functions

[build_parsing_serving_input_receiver_fn\(...\)](#) : Build a serving_input_receiver_fn expecting fed tf.Examples.

[build_raw_serving_input_receiver_fn\(...\)](#) : Build a serving_input_receiver_fn expecting feature Tensors.
