

tf.contrib.graph_editor.keep_t_if_possible_handler

```
keep_t_if_possible_handler(  
    info,  
    t  
)
```

Defined in [tensorflow/contrib/graph_editor/transform.py](#).

See the guide: [Graph Editor \(contrib\)](#) > [Module: transform](#)

Transform a tensor into itself (identity) if possible.

This handler transform a tensor into itself if the source and destination graph are the same. Otherwise it will create a placeholder. This handler is typically used to transform a hidden input tensors.

Args:

- `info`: Transform._TmpInfo instance.
- `t`: tensor whose input must be transformed into a place holder.

Returns:

The tensor generated by the newly created place holder.
