Class `ChiefSessionCreator`

Methods

`__init__`

`create_session`

Class `ChiefSessionCreator`

Inherits From: [SessionCreator](#)

Defined in [tensorflow/python/training/monitored_session.py](#).

See the guide: [Training > Distributed execution](#)

Creates a `tf.Session` for a chief.

Methods

`__init__`

```
__init__(
    scaffold=None,
    master='',
    config=None,
    checkpoint_dir=None,
    checkpoint_filename_with_path=None
)
```

Initializes a chief session creator.

Args:

- `scaffold`: A `Scaffold` used for gathering or building supportive ops. If not specified a default one is created. It's used to finalize the graph.
- `master`: `String` representation of the TensorFlow master to use.
- `config`: `ConfigProto` proto used to configure the session.
- `checkpoint_dir`: A string. Optional path to a directory where to restore variables.
- `checkpoint_filename_with_path`: Full file name path to the checkpoint file.

`create_session`

```
create_session()
```
