

tf.contrib.lookup.HasherSpec

Contents

Class HasherSpec

Properties

hasher

key

Methods

__new__

Class **HasherSpec**Defined in [tensorflow/python/ops/lookup_ops.py](#).

A structure for the spec of the hashing function to use for hash buckets.

hasher is the name of the hashing function to use (eg. "fasthash", "stronghash"). **key** is optional and specify the key to use for the hash function if supported, currently only used by a strong hash.

Fields:

- hasher** : The hasher name to use.
- key** : The key to be used by the hashing function, if required.

Properties

hasher

Alias for field number 0

key

Alias for field number 1

Methods

__new__

```
__new__(  
    _cls,  
    hasher,  
    key  
)
```

Create new instance of HasherSpec(hasher, key)
