

Module: tf.contrib.saved_model

[Contents](#)[Functions](#)

Defined in `tensorflow/contrib/saved_model/__init__.py`.

SavedModel contrib support.

SavedModel provides a language-neutral format to save machine-learned models that is recoverable and hermetic. It enables higher-level systems and tools to produce, consume and transform TensorFlow models.

Functions

`get_signature_def_by_key(...)` : Utility function to get a SignatureDef protocol buffer by its key.
