

## tf.train.latest\_checkpoint

```
latest_checkpoint(  
    checkpoint_dir,  
    latest_filename=None  
)
```

Defined in [tensorflow/python/training/saver.py](#).

See the guide: [Variables > Saving and Restoring Variables](#)

Finds the filename of latest saved checkpoint file.

## Args:

- `checkpoint_dir` : Directory where the variables were saved.
- `latest_filename` : Optional name for the protocol buffer file that contains the list of most recent checkpoint filenames. See the corresponding argument to `Saver.save()`.

## Returns:

The full path to the latest checkpoint or `None` if no checkpoint was found.
