

## tf.device

```
device(device_name_or_function)
```

Defined in `tensorflow/python/framework/ops.py`.

See the guide: [Building Graphs > Utility functions](#)

Wrapper for `Graph.device()` using the default graph.

See [tf.Graph.device](#) for more details.

## Args:

- `device_name_or_function`: The device name or function to use in the context.

## Returns:

A context manager that specifies the default device to use for newly created ops.
