

tf.keras.initializers.lecun_uniform

```
lecun_uniform(seed=None)
```

Defined in [tensorflow/python/keras/_impl/keras/initializers.py](#).

LeCun uniform initializer.

It draws samples from a uniform distribution within $[-limit, limit]$ where `limit` is `sqrt(3 / fan_in)` where `fan_in` is the number of input units in the weight tensor.

Arguments:

- `seed`: A Python integer. Used to seed the random generator.

Returns:

An initializer.
