

## tf.gfile.Exists

`Exists(filename)`

Defined in [tensorflow/python/lib/io/file\\_io.py](#).

Determines whether a path exists or not.

## Args:

- `filename`: string, a path

## Returns:

True if the path exists, whether its a file or a directory. False if the path does not exist and there are no filesystem errors.

## Raises:

- `errors.OpError`: Propagates any errors reported by the FileSystem API.
