

## tf.tables\_initializer

```
tables_initializer(name='init_all_tables')
```

Defined in [tensorflow/python/ops/lookup\\_ops.py](#).

See the guide: [Variables > Sparse Variable Updates](#)

Returns an Op that initializes all tables of the default graph.

## Args:

- `name`: Optional name for the initialization op.

## Returns:

An Op that initializes all tables. Note that if there are not tables the returned Op is a NoOp.
