

## tf.contrib.graph\_editor.filter\_ops\_from\_regex

```
filter_ops_from_regex(  
    ops,  
    regex  
)
```

Defined in [tensorflow/contrib/graph\\_editor/select.py](#).

See the guide: [Graph Editor \(contrib\)](#) > [Module: select](#)

Get all the operations that match the given regex.

## Args:

- **ops**: an object convertible to a list of **tf.Operation**.
- **regex**: a regular expression matching the operation's name. For example, `"^foo(/.*)?$"` will match all the operations in the "foo" scope.

## Returns:

A list of **tf.Operation**.

## Raises:

- **TypeError**: if ops cannot be converted to a list of **tf.Operation**.
