

tf.contrib.estimator.call_logit_fn

```
call_logit_fn(  
    logit_fn,  
    features,  
    mode,  
    params,  
    config  
)
```

Defined in [tensorflow/contrib/estimator/python/estimator/logit_fns.py](#).

Calls logit_fn.

A utility function that calls the provided logit_fn with the relevant subset of provided arguments. Similar to tf.estimator._call_model_fn().

Args:

- `logit_fn`: A logit_fn as defined above.
- `features`: The features dict.
- `mode`: TRAIN / EVAL / PREDICT ModeKeys.
- `params`: The hyperparameter dict.
- `config`: The configuration object.

Returns:

A logit Tensor, the output of logit_fn.

Raises:

- `ValueError`: if logit_fn does not return a Tensor.
