

tf.contrib.framework.get_variables

```
get_variables(  
    scope=None,  
    suffix=None,  
    collection=tf.GraphKeys.GLOBAL_VARIABLES  
)
```

Defined in [tensorflow/contrib/framework/python/ops/variables.py](#).

See the guide: [Framework \(contrib\) > Variables](#)

Gets the list of variables, filtered by scope and/or suffix.

Args:

- `scope`: an optional scope for filtering the variables to return. Can be a variable scope or a string.
- `suffix`: an optional suffix for filtering the variables to return.
- `collection`: in which collection search for. Defaults to `GraphKeys.GLOBAL_VARIABLES`.

Returns:

a list of variables in collection with scope and suffix.
