

tf.contrib.image.compose_transforms

```
compose_transforms(*transforms)
```

Defined in [tensorflow/contrib/image/python/ops/image_ops.py](#).

Composes the transforms tensors.

Args:

- `*transforms`: List of image projective transforms to be composed. Each transform is length 8 (single transform) or shape (N, 8) (batched transforms). The shapes of all inputs must be equal, and at least one input must be given.

Returns:

A composed transform tensor. When passed to `tf.contrib.image.transform`, equivalent to applying each of the given transforms to the image in order.
