

tf.estimator.export.build_raw_serving_input_receiver_fn

```
build_raw_serving_input_receiver_fn(  
    features,  
    default_batch_size=None  
)
```

Defined in [tensorflow/python/estimator/export/export.py](#).

Build a `serving_input_receiver_fn` expecting feature Tensors.

Creates an `serving_input_receiver_fn` that expects all features to be fed directly.

Args:

- `features`: a dict of string to `Tensor`.
- `default_batch_size`: the number of query examples expected per batch. Leave unset for variable batch size (recommended).

Returns:

A `serving_input_receiver_fn`.
