

tf.control_dependencies

```
control_dependencies(control_inputs)
```

Defined in [tensorflow/python/framework/ops.py](#).

See the guide: [Building Graphs > Utility functions](#)

Wrapper for `Graph.control_dependencies()` using the default graph.

See [tf.Graph.control_dependencies](#) for more details.

Args:

- `control_inputs`: A list of `Operation` or `Tensor` objects which must be executed or computed before running the operations defined in the context. Can also be `None` to clear the control dependencies.

Returns:

A context manager that specifies control dependencies for all operations constructed within the context.
