

Module: `tf.saved_model.signature_def_utils`[Contents](#)[Functions](#)

Defined in `tensorflow/python/saved_model/signature_def_utils.py`.

SignatureDef utility functions.

Utility functions for building and inspecting SignatureDef protos.

Functions

`build_signature_def(...)` : Utility function to build a SignatureDef protocol buffer.

`classification_signature_def(...)` : Creates classification signature from given examples and predictions.

`is_valid_signature(...)` : Determine whether a SignatureDef can be served by TensorFlow Serving.

`predict_signature_def(...)` : Creates prediction signature from given inputs and outputs.

`regression_signature_def(...)` : Creates regression signature from given examples and predictions.
