TensorFlow   API r1.4

Module: tf.keras.preprocessing.sequence

Contents
Functions

Defined in `tensorflow/python/keras/preprocessing/sequence/__init__.py` .

Keras data preprocessing utils for sequence data.

Functions

`make_sampling_table(...)` : Generates a word rank-based probabilistic sampling table.

`pad_sequences(...)` : Pads each sequence to the same length (length of the longest sequence).

`skipgrams(...)` : Generates skipgram word pairs.
