Module: tf.train.queue_runner

Contents
Classes
Functions

Defined in `tensorflow/python/training/queue_runner.py` .

Create threads to run multiple enqueue ops.

Classes

`class QueueRunner` : Holds a list of enqueue operations for a queue, each to be run in a thread.

Functions

`add_queue_runner(...)` : Adds a `QueueRunner` to a collection in the graph.

`start_queue_runners(...)` : Starts all queue runners collected in the graph.
