tf.logging.log_every_n

```
log_every_n(
    level,
    msg,
    n,
    *args
)
```

Defined in `tensorflow/python/platform/tf_logging.py` .

Log 'msg % args' at level 'level' once per 'n' times.

Logs the 1st call, (N+1)st call, (2N+1)st call, etc. Not threadsafe.

Args:

- `level` : The level at which to log.
- `msg` : The message to be logged.
- `n` : The number of times this should be called before it is logged.
- `*args` : The args to be substituted into the msg.
