TensorFlow   API r1.4

tf.keras.callbacks.BaseLogger

Class **BaseLogger**

Inherits From: **Callback**

Defined in **tensorflow/python/keras/_impl/keras/callbacks.py** .

Callback that accumulates epoch averages of metrics.

This callback is automatically applied to every Keras model.

Methods

__init__

```
__init__()
```

on_batch_begin

```
on_batch_begin(
    batch,
    logs=None
)
```

on_batch_end

```
on_batch_end(
    batch,
    logs=None
)
```

on_epoch_begin

```
on_epoch_begin(
    epoch,
    logs=None
)
```

on_epoch_end

```
on_epoch_end(
    epoch,
    logs=None
)
```

on_train_begin

```
on_train_begin(logs=None)
```

on_train_end

```
on_train_end(logs=None)
```

set_model

```
set_model(model)
```

set_params

```
set_params(params)
```
