tf.local_variables_initializer

> **Contents**
> Aliases:

Aliases:

- `tf.initializers.local_variables`
- `tf.local_variables_initializer`

```
local_variables_initializer()
```

Defined in `tensorflow/python/ops/variables.py` .

See the guide: Variables > Variable helper functions

Returns an Op that initializes all local variables.

This is just a shortcut for `variables_initializer(local_variables())`

Returns:

An Op that initializes all local variables in the graph.
