TensorFlow   API r1.4

tf.contrib.learn.extract_pandas_matrix

```
extract_pandas_matrix(data)
```

Defined in **tensorflow/contrib/learn/python/learn/learn_io/pandas_io.py** .

See the guide: Learn (contrib) > Input processing

Extracts numpy matrix from pandas DataFrame.

Args:

- `data` : `pandas.DataFrame` containing the data to be extracted.

Returns:

A numpy `ndarray` of the DataFrame's values.
