TensorFlow   API r1.4

tf.contrib.framework.load_checkpoint

```
load_checkpoint(filepattern)
```

Defined in `tensorflow/contrib/framework/python/framework/checkpoint_utils.py`.

See the guide: Framework (contrib) > Checkpoint utilities

Returns CheckpointReader for latest checkpoint.

Args:

* `filepattern` : Directory with checkpoints file or path to checkpoint.

Returns:

`CheckpointReader` object.

Raises:

* `ValueError` : if checkpoint_dir doesn't have 'checkpoint' file or checkpoints.
