tf.load_file_system_library

```
load_file_system_library(library_filename)
```

Defined in `tensorflow/python/framework/load_library.py`.

See the guide: Building Graphs > Utility functions

Loads a TensorFlow plugin, containing file system implementation.

Pass `library_filename` to a platform-specific mechanism for dynamically loading a library. The rules for determining the exact location of the library are platform-specific and are not documented here.

Args:

- `library_filename` : Path to the plugin. Relative or absolute filesystem path to a dynamic library file.

Returns:

None.

Raises:

- `RuntimeError` : when unable to load the library.
