tf.contrib.graph_editor.replace_t_with_placeholder_handler

```
replace_t_with_placeholder_handler(
    info,
    t
)
```

Defined in **tensorflow/contrib/graph_editor/transform.py**.

See the guide: Graph Editor (contrib) > Module: transform

Transform a tensor into a placeholder tensor.

This handler is typically used to transform a subgraph input tensor into a placeholder.

Args:

- `info` : Transform._TmpInfo instance.
- `t` : tensor whose input must be transformed into a place holder.

Returns:

The tensor generated by the newly created place holder.
