tf.contrib.framework.get_trainable_variables

```
get_trainable_variables(
    scope=None,
    suffix=None
)
```

Defined in `tensorflow/contrib/framework/python/ops/variables.py`.

Gets the list of trainable variables, filtered by scope and/or suffix.

Args:

- `scope` : an optional scope for filtering the variables to return.
- `suffix` : an optional suffix for filtering the variables to return.

Returns:

a list of variables in the trainable collection with scope and suffix.
