TensorFlow   API r1.4

tf.serialize_tensor

```
serialize_tensor(
    tensor,
    name=None
)
```

Defined in `tensorflow/python/ops/gen_parsing_ops.py`.

Transforms a Tensor into a serialized TensorProto proto.

Args:

- `tensor` : A `Tensor` . A Tensor of type `T` .
- `name` : A name for the operation (optional).

Returns:

A `Tensor` of type `string` . A serialized TensorProto proto of the input tensor.
