tf.contrib.seq2seq.BeamSearchDecoderState

Contents
Class BeamSearchDecoderState
Properties
  cell_state
  finished

Class **BeamSearchDecoderState**

Defined in **tensorflow/contrib/seq2seq/python/ops/beam_search_decoder.py** .

Properties

cell_state

Alias for field number 0

finished

Alias for field number 2

lengths

Alias for field number 3

log_probs

Alias for field number 1

Methods

__new__

```
__new__(
    _cls,
    cell_state,
    log_probs,
    finished,
    lengths
)
```

Create new instance of BeamSearchDecoderState(cell_state, log_probs, finished, lengths)
