tf.graph_util.must_run_on_cpu

```
must_run_on_cpu(
    node,
    pin_variables_on_cpu=False
)
```

Defined in **tensorflow/python/framework/graph_util_impl.py** .

Returns True if the given node_def must run on CPU, otherwise False.

Args:

- **node** : The node to be assigned to a device. Could be either an ops.Operation or NodeDef.
- **pin_variables_on_cpu** : If True, this function will return False if node_def represents a variable-related op.

Returns:

True if the given node must run on CPU, otherwise False.
