TensorFlow   API r1.4

tf.keras.backend.l2_normalize

```
l2_normalize(
    x,
    axis=None
)
```

Defined in `tensorflow/python/keras/_impl/keras/backend.py` .

Normalizes a tensor wrt the L2 norm alongside the specified axis.

Arguments:

- `x` : Tensor or variable.
- `axis` : axis along which to perform normalization.

Returns:

A tensor.
