TensorFlow   API r1.4

Module: tf.contrib.memory_stats

Contents

Functions

Defined in `tensorflow/contrib/memory_stats/__init__.py`.

Ops for memory statistics.

Functions

`BytesInUse(...)` : Generates an op that computes the current memory of a device.

`BytesLimit(...)` : Generates an op that measures the total memory (in bytes) of a device.

`MaxBytesInUse(...)` : Generates an op that computes the peak memory of a device.
