tf.keras.backend.expand_dims

```
expand_dims(
    x,
    axis=-1
)
```

Defined in `tensorflow/python/keras/_impl/keras/backend.py` .

Adds a 1-sized dimension at index "axis".

Arguments:

- `x` : A tensor or variable.
- `axis` : Position where to add a new axis.

Returns:

A tensor with expanded dimensions.
