tf.compat.as_str_any

Contents
Aliases:

Aliases:

- `tf.compat.as_str_any`
- `tf.contrib.meta_graph_transform.meta_graph_transform.compat.as_str_any`

```
as_str_any(value)
```

Defined in `tensorflow/python/util/compat.py`.

Converts to `str` as `str(value)`, but use `as_str` for `bytes`.

Args:

- `value` : A object that can be converted to `str`.

Returns:

A `str` object.
