tf.gfile.Copy

```
Copy(
    oldpath,
    newpath,
    overwrite=False
)
```

Defined in `tensorflow/python/lib/io/file_io.py` .

Copies data from oldpath to newpath.

Args:

- `oldpath` : string, name of the file who's contents need to be copied
- `newpath` : string, name of the file to which to copy to
- `overwrite` : boolean, if false its an error for newpath to be occupied by an existing file.

Raises:

- `errors.OpError` : If the operation fails.
